

WYRE MINUTES

August 2024

• NEWS •

These past months have been busy for WYRE!

We leaned into compliance as a service.

We partnered with [Tandem Cyber Solutions](#) to provide penetration tests.

We're diving deeper into the state and local government space, including higher education.

We successfully responded to—and won! — an RFP (more to come soon!).

Our marketing director is a finalist for [Liongard's Visionary Vanguard Award](#).

And WYRE is a finalist for their Rising Star Award!

• REFERRAL PROGRAM •

Our referral program is going strong!

Know someone we can help? Want to earn a *minimum* referral fee of \$1,000 if an introduction leads to *any* ongoing services?

WYRE offers a very generous referral bonus for anyone who introduces us to someone we might be able to help. If we end up doing work for them, you can earn a significant commission!

Reach out to Tyler for more info: tyork@wyretechnology.com

• STAFF SPOTLIGHT •

MEET MIKE

CTO

If you don't yet know Mike Wade, you're missing out.

Although his humility hardly allows him to acknowledge it, Mike is a cornerstone of the Chattanooga tech community and has contributed heavily to many local startups, as well as to the internet infrastructure you're likely using to read this very post!

His early 90's hacker stories are legendary (make him tell you a few sometime)—from having a certain three-letter agency knock on his parents' door as a kid and feigning ignorance, to building root kits for early operating systems, to working on a project with Julian Assange via bulletin board posts.

Today's Mike is no slouch either. He acts as the principal architect for WYRE's technical solutions. What we deliver to our customers is critical, and we rely on his (and others') expertise to ensure we're always on the cutting edge, following best practices, and providing the highest level of security possible.

One of the greatest benefits of partnering with WYRE is access to our ridiculously talented staff of engineers. Mike, and his team, are always ready and happy to help!

• CASE STUDY •

When it comes to modern manufacturing, maintaining seamless operations is a multidimensional challenge. From establishing resilient network infrastructure to safeguarding critical systems, the demands are relentless.

When a regional manufacturing company encountered these difficulties, they turned to WYRE for assistance in network optimization, cybersecurity enhancement, and technological modernization.

This digital transformation in manufacturing case study chronicles our collaborative efforts to empower their technology, bringing in new resources and creating an environment ready for growth and innovation.
