

WYRE MINUTES

November 2024

• NEWS •

Fall has really seen the pace pick up!

We began working with Department of Defense contractors.

We officially moved into our new offices.

We'll be featured in December's issue of [Edge magazine](#).

And we won Tech Company of the Year at the 2024 [ChaTech](#) TechX Awards!

• REFERRAL PROGRAM •

Our referral program is still going strong!

Know someone we can help? Want to earn a *minimum* referral fee of \$1,000 if an introduction leads to *any* ongoing services?

WYRE offers a very generous referral bonus for anyone who introduces us to someone we might be able to help. If we end up doing work for them, you can earn a significant commission!

Reach out to Tyler for more info: tyork@wyretechnology.com

• STAFF SPOTLIGHT •

MEET TYLER

CEO

Tyler York is one of a kind. As CEO, he handles all of our external sales. He manages all the leadership folks. He's one of the visionaries of what's next, what we should focus on, and emerging technologies. Probably most importantly, he helps build partnerships with customers and vendors all over the world!

He's curious, determined, resilient, creative, honest, and humble. But his biggest strength is being relentless. He doesn't give up but keeps going until he figures things out. He also has a strong ability to get people together to work on problems.

WYRE wouldn't exist without him—literally. It was his idea, and he put in the hours to make sure it was built on solid ground.

• CASE STUDY •

For today's banking industry, ensuring uninterrupted services is a more complex undertaking than ever.

From fortifying digital banking platforms to protecting sensitive customer data, the challenges are unending.

Recently, a regional bank reached out to WYRE for help with implementation of Microsoft 365's Active Directory Certificate Services (AD CS). They were looking to incorporate encryption, digital certification, and authentication to improve their cybersecurity posture.
